Makrolon® Lumen XT enhances a lobby interior to create an interactive video experience

Application

Interior lobby for DIRECTV

Background

Around the globe, office buildings have a similar vibe. When it came time to enhance the lobby of a multi-national satellite provider thinking outside the box was the directive. The Electroland design team was charged with creating an interactive space full of light and color while being energy efficient and maintaining a professional image.

Challenges

The high traffic lobby presented challenges unique to this installation. The design incorporated large spans creating an interactive tunnel of changing LED lights. The tall structure required a product that was lightweight, easy to fabricate and could be formed to the framing system. The materials needed to have a good balance of weight to stiffness and provide the correct amount of diffused light.

Solution

Makrolon® Lumen XT LW7 polycarbonate sheet

- Unique light diffusing capabilities
- Lightweight
- Easy to handle and install
